

Freelance Frontend developer

# IVANA SETIAWAN

I am an outgoing and energetic nerd, seeking a freelance project that fits my professional skills and personality. I am passionately in love with front-end shizzle and very much eager to learn new tools & frameworks. I have been writing code since 2009 and prefer to work with scrum methodology. I believe that **TDD** is the best way to keep your code bug free, super pretty, modular & accessible.

## Skills:

- Modular front-end code
- Web accessibility [Accessible Rich Internet Applications (ARIA)]
- Git
- ES6, jQuery
- Javascript Unit Testing (Mocha, Chai, Sinon)
- Javascript package manager, such as NPM & Yarn
- Build automation tool, such as Gulp & Grunt
- Continuous Integration & Pull Requests

## PROJECTS

**UWV** | Position: Senior front-end developer | July 2017 - present

Angular 4, Browserstack, Selenium, Nightwatch, Git, Gulp, ARIA, HTML5, SCSS, Sketch

My main role is to lead the front-ender(s) at UX team, maintain the quality of the code, rebuild werk.nl project on Angular 4, and writing the front-end test using Browserstack (using Selenium + Nightwatch).

---- ¶ ----

**Funda** | Position: Front-end developer | August 2015 - July 2017

HTML5, SCSS, ES6, jQuery, Optimizely, Git, Gulp, Mocha, Chai, Sinon, Sketch

My role at funda is as front-end developer in the team New Business. We're the startup team of Funda; in short, our role as a team is to explore and build awesome projects outside the generic funda projects.

---- ¶ ----

**Venopi** | Position: Founder, Designer, & Developer | April 2015 - present

Sketch, HTML5, SCSS, ES6, jQuery, SEO experiments, Git, Gulp

As a founder, my main responsibility is to ensure that Venopi delivers a great product. My ambition is to make impact by providing good service, while remaining humble.

---- ¶ ----

**Mangrove** | Position: Front-end developer | April 2012 - July 2015

HTML5, SCSS, jQuery, Optimizely, Git

Front end coding for Mangrove clients such as Hartstichting, Omron, MyLaps, Ahrend, etc.

---- ¶ ----

**80beans** | Position: Designer & Front-end developer | April 2010 - April 2012

HTML5, SCSS, jQuery, Photoshop

Front end coding for web apps (Ruby on Rails) and slicecraft's clients. (Slicecraft is a front-end service, specialized for Ruby on Rails projects. We transform your design to reality with the best practise, modular front-end techniques)

---- ¶ ----

**Subset M** | Position: Designer and Front end developer | August 2009 - July 2010

HTML, CSS, Photoshop

Design & build multiple web and promotional materials for clients, also training interns to assist with several design projects.
