

Freelance Front-end developer

Ivana Setiawan

I am an outgoing and energetic nerd, seeking a freelance project that fits my professional skills and personality. I am passionately in love with front-end shizzle and very much eager to learn new tools & frameworks.

I have been writing code since 2010 and prefer to work with scrum methodology. I believe that TDD is the best way to keep your code bug free, super pretty, modular & accessible.

And oh, I really enjoy UX Design. My latest project is Venopi.

Skills:

- Modular front-end code
- Web accessibility [Accessible Rich Internet Applications (ARIA)]
- Git
- ES6, React, Angular, Vue, jQuery
- Javascript Unit Testing (Mocha, Chai, Sinon)
- Javascript package manager, such as NPM & Yarn
- Build automation tool, such as Webpack, Gulp & Grunt
- Continuous Integration & Pull Requests
- Sketch, Figma, Canva

PROJECTS

Venopi | Position: Founder/CEO and Developer | November 2019 - present

Git, Gulp, ARIA, HTML5, SCSS, ES6, Vue3, Sketch, UX Design

Making it easy for anyone to organise events.

We enable anyone to find and book various local vendors for events, such as venues, caterers, entertainers, photographers, cake specialists — anything you can think of to make your event a success!

---- ¶ ----

KPN | Position: Front-end developer | November 2017 - July 2019

React, Redux, Git, HTML5, SCSS, Sketch, UX Design

I belonged to the DDCI (Data-Driven Customer Interaction) team. Our main task is to build the most awesome Campaign tool (marketing dashboard) for KPN using React + Redux.

---- ¶ ----

UWV | Position: Senior front-end developer | July 2017 - December 2017

Angular 4, Browserstack, Selenium, Nightwatch, Git, Gulp, ARIA, HTML5, SCSS, Sketch

My main role is to lead the front-ender(s) at UX team, maintain the quality of the code, rebuild werk.nl project on Angular 4, and writing the front-end test using Browserstack (using Selenium + Nightwatch).

---- ¶ ----

HackYourFuture | Position: Code mentor | September 2017 - present

ARIA, HTML5, CSS, JS

HackYourFuture is a code school (foundation) teaching computer programming to refugees.

Our aim is to empower our students through coding and get them to work as software developers.

---- ¶ ----

Funda | Position: Front-end developer | August 2015 - July 2017

HTML5, SCSS, ES6, jQuery, Optimizely, Git, Gulp, Mocha, Chai, Sinon, Sketch

My role at funda is as front-end developer in the team New Business. We're the startup team of Funda; in short, our role as a team is to explore and build awesome projects outside the generic funda projects.

---- ¶ ----

Mangrove | Position: Front-end developer | April 2012 - July 2015

HTML5, SCSS, jQuery, Optimizely, Git

Front-end coding for Mangrove clients such as Hartstichting, Omron, MyLaps, Ahrend, etc.

---- ¶ ----

80beans | Position: Designer and Front-end developer | April 2010 - April 2012

HTML5, SCSS, SASS, jQuery, Photoshop

Front-end coding for web apps (Ruby on Rails) and slicecraft's clients. (Slicecraft is a front-end service, specialized for Ruby on Rails projects. We transform your design to reality with the best practise, modular front-end techniques)

---- ¶ ----

Subset M | Position: Designer and Front-end developer | August 2009 - July 2010

HTML, CSS, Photoshop

Design & build multiple web and promotional materials for clients, also training interns to assist with several design projects.
