Freelance Front-end developer

Ivana Setiawan

I am an outgoing and energetic nerd, seeking a freelance project that fits my professional skills and personality. I am passionately in love with front-end shizzle and very much eager to learn new tools & frameworks.

I have been writing code since 2010 and prefer to work with scrum methodology. I believe that **TDD** is the best way to keep your code bug free, super pretty, modular & accessible.

Skills:
- Modular front-end code
- Web accessibility [Accessible Rich Internet Applications (ARIA)]
- Git
- ES6, jQuery
- Javascript Unit Testing (Mocha, Chai, Sinon)
- Javascript package manager, such as NPM & Yarn
- Build automation tool, such as Gulp & Grunt
- Continuous Integration & Pull Requests

PROJECTS

Venopi | Position: Founder, CEO and Developer | *November 2017 - present*
```
Git, Gulp, ARIA, HTML5, SCSS, Javascript, Sketch, UX Design
```

Marketplace for commercial and non-traditional spaces. We enable businesses to rent out their space when it's empty.

Without the community, there's no Venopi. Our mission is to enable and empower people, using the assets they already have, starting with space. We believe that when we are able to empower the people, we can create a stronger community; and with a better society, we lift up humanity.

---- ¶ ----

KPN | Position: Front-end developer | *November 2017 - July 2019*
```
React, Redux, Git, HTML5, SCSS, Sketch, UX Design
```

I belong to DDCI (Data-Driven Customer Interaction) team. Our main task is to build the most awesome Campaign tool (dashboard) for KPN using React + Redux.

---- ¶ ----

UWV | Position: Senior front-end developer | *July 2017 - December 2017*
```
Angular 4, Browserstack, Selenium, Nightwatch, Git, Gulp, ARIA,
HTML5, SCSS, Sketch
```

My main role is to lead the front-ender(s) at UX team, maintain the quality of the code, rebuild werk.nl project on Angular 4, and writing the front-end test using Browserstack (using Selenium + Nightwatch).

---- ¶ ----

HackYourFuture | Position: Code mentor | *September 2017 - present*
```
ARIA, HTML5, CSS
```

HackYourFuture is a code school (foundation) teaching computer programming to refugees. Our aim is to empower our students through coding and get them to work as software developers.

Funda | Position: Front-end developer | *August 2015 - July 2017*
```
HTML5, SCSS, ES6, jQuery, Optimizely, Git, Gulp, Mocha, Chai,
Sinon, Sketch
```

My role at funda is as front-end developer in the team New Business. We're the startup team of Funda; in short, our role as a team is to explore and build awesome projects outside the generic funda projects.

---- ¶ ----

Venopi | Position: Founder & Technical Director | *April 2015 - present*
```
Sketch, HTML5, SCSS, ES6, jQuery, SEO experiments, Git, Gulp
```

As a founder, my main responsibility is to ensure that Venopi delivers a great product. My ambition is to make impact by providing good service, while remaining humble.

---- ¶ ----

Mangrove | Position: Front-end developer | *April 2012 - July 2015*
```
HTML5, SCSS, jQuery, Optimizely, Git
```

Front-end coding for Mangrove clients such as Hartstichting, Omron, MyLaps, Ahrend, etc.

---- ¶ ----

80beans | Position: Designer and Front-end developer | *April 2010 - April 2012*
```
HTML5, SCSS, SASS, jQuery, Photoshop
```

Front-end coding for web apps (Ruby on Rails) and slicecraft's clients. (Slicecraft is a front-end service, specialized for Ruby on Rails projects. We transform your design to reality with the best practise, modular front-end techniques)

---- ¶ ----

Subset M | Position: Designer and Front-end developer | *August 2009 - July 2010*
```
HTML, CSS, Photoshop
```

Design & build multiple web and promotional materials for clients, also training interns to assist with several design projects.
